excellence in integrated healthcare

May 6, 2008

Gerri Monhollen worked in our office as office manager for over five years. She handled not only the daily business activities such as customer service, all billing, personnel, insurance issues, credentialing, A/R, and payroll but any other task we asked of her with professionalism and skill. She is quick to take care of any issue and always does whatever it takes to complete a project in a well done and timely manner. She has a keen sense of billing and the insurance industry and we found that throughout her time with us, she was able to collect our revenue better than anyone we have ever employed. She continues to handle all our billing matters to this day as she has decided to open her own billing company.

Sincerely,

Jeff Elwert
